- 2 Thread: New requirement - loyalty module
- 3 Marcus,
- 4 Following the marketing review, the board wants a customer loyalty capability included in the platform before we go live - points accrual, redemption at the till, and a member database. I appreciate this was not in the original SOW, but it is now a priority for us.
- 5 Can you scope this as a change and let us have the cost and any timetable impact? We accept there may be a knock-on to the go-live date and we are willing to discuss a revised date to accommodate it.
- 6 Helena
- 7 Helena,
- 8 Thanks. We've scoped the loyalty module. The additional cost is £180,000 and, given the additional build and test, we will need to move go-live from 1 October to 18 November 2024. I'll issue Change Order 3 for Priya's signature to confirm both the scope and the revised date.
- 9 Marcus
